PROJECTS

Employee Management System

May 2026

Java, MySQL

- Engineered core CRUD logic in Java to manage employee lifecycles, utilizing JDBC/Hibernate to ensure seamless data flow between the application and a SQL database.
- Developed robust data validation and business rules in Java to maintain data integrity, preventing invalid entries and ensuring accurate salary and departmental updates.
- Authored optimized SQL queries and Java service methods to perform complex data operations, reducing search latency and improving the efficiency of record retrieval.

Library Management System

June 2026

Java, MySQL

- Built a Library Management System in Java to automate book lending, returns, and inventory tracking using SQL.
- Implemented time-based logic in Java to calculate overdue fines and update book availability status in real-time.
- Designed a relational SQL schema to manage many-to-many relationships between books, authors, and registered members.
